STANDARD COLOR CHART

As approved and adopted by
Chamber of Commerce of Athletic Goods Manufacturers
For Athletic Wear, Felt Lettering, Etc.

COLOR MATCHING

There is no known process which can positively regulate the final results when either cotton or worsted yarns or cloth are dyed.

In both yarns and fabrics—even though the finest dyes are used—each lot may absorb the color in a different manner and vary in shading when finished.

Every possible effort is made to match colors as closely as the peculiarities in dyes and in dye action will permit, but the situation is not controllable.

NOTE—All orders are therefore handled by us with the understanding that the purchaser realizes these conditions and accepts the responsibility for any variations.

SAMPLES

We cannot supply our numerous dealers with special samples on memorandum. These samples must be made by us as special orders and will not be subject to credit at any time.
